Important:

Self-installation instructions and advice are provided for your convenience. It is your responsibility to determine if you have the knowledge, skills, and physical ability required to properly perform an installation. ProClip USA, Inc. shall have no liability for damage or injury resulting from the installation or use of any ProClip or third party products. It is your responsibility to ensure that all products are installed in adherence with local laws and regulations and in such a manner as to allow a vehicle to be operated safely and without distraction. ProClip USA, Inc. product warranties do not cover the installation, removal or re-installation of any product.

Attention:

Carefully read all instructions and review the images before installing this product.

1. To adjust the holder for your device:

Loosen the locking wheels on the back of the holder to adjust the sides of the holder. Open up the sides to the maximum size. Place your device in the holder and press the sides together so the device is firmly in place. The spring action top right corner should not be stretched. Tighten both of the wheel nuts firmly. Your holder is now fitted to your device.

2. Unscrew the screw in the center of the holder and remove the holder from the Tilt Swivel base plate. Place the base plate over the matching holes in your mounting bracket (demo ProClip mount shown in picture). Attach the base plate by using the applicable screws enclosed - self-tapping screws if the mount has small holes or machine screws with nuts if the mount has larger holes. Place the holder onto the Tilt Swivel base plate and attach it with the center screw. Adjust the holder to the preferred position and tighten the screw firmly. Then loosen the screw slightly for easier angling and / or rotation of the holder between landscape and portrait position.

3. To place your device in the holder:

Insert the top right corner of the device into the holder and press upward/rightward to extend the spring action arm. Lower the device into the holder.

To remove the device:

Press the device upward/rightward until it comes loose and can be removed from the holder.

4. The holder and tablet is in place shown in portrait and landscape position.
