Attention:

Carefully read all instructions and review the images before installing this product.

1. Use the enclosed hex keys to remove the front facing screws on the mount so it splits into two parts. Loosen the screw in the center-bottom so the face plate can slide freely back and forth. Place the back of the headrest mount onto the headrest posts. Place the front part of the headrest mount, equipped with a mounting face plate, onto the back part of the headrest bars so the screw holes line up. Tighten the screws enough to hold the headrest mount in place but loose enough that it can be adjusted up or down.

2. Adjust the face plate into desired position. Tighten the center-bottom screw until the mounting face is firmly in place.

Adjust the height of the headrest to the desired position then tighten the front facing screws on the headrest mount so the mount is firmly in place.

3. To attach the device holder: Line up the center screw of the holder with the matching socket on the mounting face. Use a Phillips screwdriver to tighten the screw into place.

4. To place the device in the holder: Remove the Spring Lock by pulling firmly on the block until it pops off. Insert the device into the grooves and put the spring block back in place to secure.

To remove the device from the holder: Remove the Spring Lock by pulling firmly on the block until it pops off. Slide the device out of the grooves.
